

JOKER

JOKER gives someone their own sun. It lights their own space, can be moved easily to their own place and can be adjusted to their own mood with the Tunable White technology. JOKER is not just the evolution of the table lamp, it's the revolution. Its unique design directs light only to where it's wanted and needed. Although it has a very wide beam it has a very defined visual cut-off and there are no multiple shadows. Light is focussed and concentrated. And it is glare-free.

FEATURES

- Asymmetrical light distribution for glare-free light
- Vertical light-emitting surface
- Simple design, clear lines and a nearly borderless optic
- High-grade anodised aluminium housing
- Simple, intuitive control with only one operating button directly on the luminaire
- Freely positionable on the table and easy to connect via USB-C connection [15 V]

TECHNICAL DATA

System power	11 W
Luminous flux of luminaire	330 lm
Colour temperature	2700 K – 5000 K [Tunable White]
Colour Rendering Index [CRI]	Ra ≥ 90
Maintained luminous flux	L80 50'000 h
Protection class	II
Ingress Protection	IP20
Photobiological safety	Risk group 1, low risk

SPECIFICATIONS

- Perfectly even illumination of the work surface of 60 x 60 cm with up to 600 lx
- Colour temperature can be adjusted individually with the Tunable White technology [2700 – 5000 K]
- Power supply unit with USB-C connection included
- Housing colours: black, silver, bronze
- Luminaire housing made of high-grade anodised aluminium
- Operating unit integrated
- Height: 545 mm

APPLICATION AREAS

- Office & Education:** offices, open-plan offices, individual workstations, concentration workstations
- Retail & Hospitality:** counters, living spaces, hotels
- Home & Living**

IP20 230V 650°C
